Summary

As a full-stack developer with one year of experience in Ruby on Rails, I am passionate about creating efficient and user-friendly web applications that meet the needs of both clients and end-users. My expertise in both front-end and back-end development allows me to tackle complex projects with confidence, from database design and architecture to responsive design and user experience.

Throughout my career, I have gained experience working with a variety of frameworks and technologies, including Ruby on Rails, JavaScript, HTML/CSS, REACT.JS, HAML, ERB, JAVASCRIPT, JQUERY, TAILWIND CSS, BOOTSTRAP CSS, SEMANTIC UI, GITHUB, DOCKER and SQL. I am comfortable working with both established and emerging technologies, and I am always eager to learn new skills and tools to improve my development process.

I am dedicated to writing clean, maintainable code that is optimized for performance and scalability, and I always strive to follow best practices and standards. I believe in the importance of collaboration and communication, and I am always looking for ways to work effectively with team members, stakeholders, and clients to achieve project success.

If you're looking for a skilled and motivated full-stack developer with expertise in Ruby on Rails, please feel free to connect with me. I'm always interested in discussing new opportunities and challenges in web development.

Experience

Associate Software Engineer

Direct Support

Mar 2022 - Present (1 year 5 months)

Education

Ncba&e

Bachelor's degree, Computer Science

2017 - 2021
